Filip Iversen

Senior Product Designer

St. Louis area, Missouri | Open to full-time remote roles
filip@filipiversen.com | (636) 634-0951
filipiversen.com | LinkedIn

Product designer with 10+ years designing and building digital products. Led commercial lending design, created shared design systems, and co-founded an AI-native survey platform. Combines user research and interaction design with the frontend experience to carry decisions through to production.

Selected experience

Lenders Cooperative & Allocore

Senior Product Designer | Oct 2024 - Oct 2026

Joined full-time after an initial contract through Northway. Owned commercial product design within a six-person team spanning commercial and government lending.

- Redesigned loan origination around an application workspace, reducing repeated trips to a task queue spanning all loans. Added guided progression, flexible navigation, progress and blockers. Customers and Customer Success reported faster origination after launch.
- Used interviews with banks and credit unions, Customer Success calls, and internal origination teams to understand different lending processes. Designed the workspace to support those differences while retaining existing task screens.
- Led the initial borrower portal redesign and completed it with the broader design team for government release, including the SBA portal. Simplified navigation between loan accounts, tasks and messages.
- Led the move from Adobe XD to Figma and created Peak, the shared design system adopted by all designers across both businesses. Defined three token layers and built the commercial implementation in code.

Survey Loop

Co-Founder, Product Design & Engineering | Aug 2023 - Present

AI-native customer experience and survey platform for financial services and events. Lead product design and frontend engineering; contribute backend features with a backend partner. Part-time alongside employment at Lenders Cooperative.

- Designed and built the survey editor, combining drag-and-drop question blocks, inline editing, a contextual sidebar and autosave. Created the shared design system and coded component library.
- Designed and developed an in-product AI assistant and reporting with response citations. Refined reporting prompts after testing revealed unsupported conclusions and overstated sentiment, requiring evidence and proportionate summaries.
- Built Model Context Protocol (MCP) tools that let AI assistants create and edit surveys and analyze responses, extending the product into conversational interfaces.

Additional experience

Northway

Founder, Product Design & Engineering | 2020 - Present

Independent design and engineering practice, now full-time. Previously operated alongside employed roles; followed an earlier independent practice in Norway.

- Designed and built a production insurance platform with a backend partner, replacing third-party quoting, policy submission and CRM software. Owned the product experience and frontend implementation for customer and internal workflows.
- Shipped the initial production release in a few weeks and continue to improve the platform weekly.

Denim Social

Product Designer | Apr 2022 - Aug 2023

Social media software for financial institutions.

- Introduced an AI post generator, owning product design and frontend implementation in partnership with a backend engineer.
- Built the design system from scratch and developed Vue features alongside the engineering team.

Earlier experience in Norway

Independent Design & Engineering | Founder | 2014 - 2020
Self-employed in Norway, designing websites and building web applications for clients.

Lemon | Web Designer | 2014
Designed and built websites for commercial real estate.

Amedia Ressurs | Graphic Designer | 2012 - 2014
Designed advertising materials, graphics and responsive web and mobile interfaces.

Skills

Product design: User interviews, workflow design, information architecture, interaction design, prototyping, usability testing and design direction.

Design systems: Figma, design tokens, component libraries, Storybook and documentation.

Accessibility: WCAG AA design, contrast and keyboard-navigation audits, and remediation with frontend teams.

Frontend engineering: HTML, CSS, responsive interfaces, React, Next.js, Vue and TypeScript.

AI products: Conversational interfaces, generative AI reporting, response citations, MCP and AI-assisted prototyping.

Domains: Commercial and government lending, loan origination and servicing, insurance and customer experience SaaS.

Languages: English: fluent. Norwegian: native.
